POSSIBILITIES.

abbvie

A close-up photograph of a middle-aged man and woman smiling warmly. The man is on the left, looking towards the woman on the right. They are outdoors, with a blurred background of green foliage and sunlight filtering through the leaves. The man has short, graying hair and is wearing a gray sweater. The woman has long, dark hair and is wearing a patterned top and a necklace. The overall mood is positive and intimate.

AT A GLANCE

AbbVie is a global, research-based biopharmaceutical company formed in 2013 and previously part of Abbott Laboratories. At AbbVie, we use our expertise, dedicated people, and unique approach to innovation to develop and market advanced therapies that address some of the world's most complex and serious diseases.

Ranked
among the
TOP 50

Best Workplaces in Canada
by Great Place to Work®

Globally
29,000+ employees,
over **500** in Canada

Over **15,000**
Canadians participate
in **132** clinical trials

Market and distribute
medicines in
177 countries

Invest **17%**
of our global
revenue in R&D

To date

80,000
Canadians

have benefitted from our support
programs which offer help with
medication
administration,
adherence,
disease education,
and financial coverage

More than

1 million
Canadians
are treated every
year with an
AbbVie medicine

FOCUS MATTERS

We focus on discovering, developing and delivering medicines in therapeutic areas where we have a proven expertise and where we can have a significant impact. These areas include:

IMMUNOLOGY

ONCOLOGY

VIROLOGY

NEUROSCIENCE

INVESTING TO ADVANCE SCIENCE

Making A Remarkable Impact

AbbVie invested \$4.2 billion US in research and development (R&D) in 2016, which represents 17% of our global revenue. We are deeply committed to efforts that advance science and solve the world's toughest health challenges.

8,000 R&D employees at Work Today

AbbVie's innovation is driven by leading scientists and facilities. IDEA Pharma's Productive Innovation Index ranked AbbVie #5 among the top 30 pharmaceutical companies most successful at developing and commercializing new medicines.

At AbbVie, 67% of our phase 3/3B pipeline programs are considered a "novel mechanism of action," which is considered first-in-kind in the scientific community.

ABBVIE HAS A ROBUST PIPELINE

Multiple new molecules are being studied in
over

20 **CANCERS AND
TUMOUR TYPES**

Our late-stage pipeline has the potential to deliver

20 **NEW MEDICINES
OR INDICATIONS**
BY 2020

2 **late-stage molecules**
are being studied in rheumatology,
gastroenterology and dermatology

PARTNERING TO DRIVE INNOVATION

As of 2015, there are approximately

400 rheumatologists
in Canada.

Yet more than **4.6 million**
Canadians report living with arthritis.

Arthritis costs the Canadian
economy an estimated

\$33 billion every year
in health care and lost productivity.

That number is expected

to double by 2031.

The McMaster University AbbVie Chair
in Rheumatology Education provides an
**outstanding learning opportunity for
Canadian medical students with an
interest in rheumatology.**

The University of British Columbia (UBC) AbbVie Professorship in Medication Adherence is **helping to identify and eliminate barriers for patients and pharmacists that support medication adherence.**

“Medication non-adherence is truly an epidemic and as a pharmacoepidemiologist, I am proud to be dedicating my research program to addressing it.”

-Dr. Mary De Vera,
Recipient of the UBC AbbVie
Professorship in Medication Adherence

AbbVie is investing
\$15.5 million
with Structural
Genomics Consortium
to **help scientists better
understand how proteins
are involved in human
diseases**, specifically
in immunology and
oncology.

AbbVie has funded **130 radiation oncology research projects** with the Canadian Association of Radiation Oncology, representing a **\$3 million investment.**

The AbbVie IBD Scholarship Program supports Canadian students living with Crohn's and colitis who are pursuing post-secondary education.

AbbVie  **IBD**
Scholarship Program
Brought to you by Crohn's and Colitis Canada

“The AbbVie IBD Scholarship Program has helped me focus on my health and education so I can be the best I can be and show others that IBD does not have to stop you from reaching your goals.”

- Clinton, Scholarship Recipient

69% of young Canadians with Crohn's or colitis delay completing their post-secondary education.

People with IBD are usually diagnosed **between the ages of 15 and 30**, with the typical onset being in the early 20s.

The number of new cases of Crohn's disease in Canadian children has almost

DOUBLED since 1995, and is as **common as type 1 diabetes**.

OUR SUPPORT PROGRAMS

HELPING PATIENTS THROUGH THEIR JOURNEY

AbbVie is committed to understanding the patient experience in Canada and to helping patients gain access to the medication and support they need.

OVER **12 YEARS**
OF EXPERIENCE

80,000
patients enrolled to date

Over **10,000**
patients enrolled per year

2,500
Canadians
BENEFIT EVERY MONTH
FROM OUR MEDICATIONS
AT NO COST

“The AbbVie Care program has made things easy for me and my family, so we can get on with our lives.”

-Marisol, AbbVie Care member

“I really appreciated knowing I could call AbbVie Care at any time and someone would be there with information, trying to connect me with the resources I needed.”

-William, AbbVie Care member

“The AbbVie Care team has been with me right from the start, taking care of every aspect of my treatment. They not only stayed in touch with me, but also let my health care team know how I’m doing.”

-Taline, AbbVie Care member

MEMBERS OF OUR LARGEST
SUPPORT PROGRAM WHO RECEIVE ADHERENCE
SERVICES ARE, ON AVERAGE,

**12% MORE ADHERENT
TO THEIR ABBVIE
MEDICATION**

THAN THOSE WHO DO NOT RECEIVE SUPPORT.
