

Instructions for Use
Pr LUPRON®
(leuprolide acetate injection)
Pre-filled syringe

Please read complete instructions before using LUPRON.

Follow the steps below each time you use LUPRON

Prepare for Injection

STEP 1

- Wash hands.

STEP 2

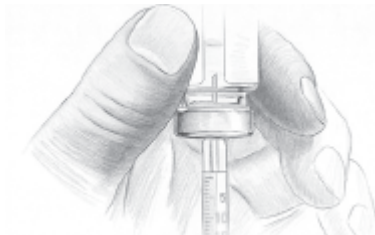

- Use an alcohol swab to wipe the metal ring and rubber stopper on the medication vial before each use.

STEP 3

- Uncover needle. Do not touch needle.
- Place the vial on a clean, flat surface and push the needle through the centre of the rubber stopper on the vial.
- Push the plunger all the way in.

STEP 4

- Keep the needle in the vial.
- Lift the vial and turn it upside down, keeping it vertical.
- Check to see that the needle tip is in the liquid.

<p>STEP 5</p> 	<ul style="list-style-type: none"> • With the needle tip in the liquid, slowly pull back the plunger until the syringe fills to the proper mark. • If any bubbles appear in the syringe, remove them by pushing the plunger up slowly. • With the needle tip still in the liquid, pull the plunger until it is at the proper mark again.
<p>Inject LUPRON</p>	
<p>STEP 6</p> 	<ul style="list-style-type: none"> • Choose a different injection site each day. • Wipe the injection site with a new alcohol swab. • Hold the skin the way you were instructed. • Slide the needle quickly all the way through the skin, into the subcutaneous tissue, at a 90° angle.
<p>STEP 7</p> 	<ul style="list-style-type: none"> • Push the plunger to inject the medication. • Withdraw the needle at the same angle it was inserted (90°). • Dab an alcohol swab on the skin.
<p>After your Injection</p>	
<p>STEP 8</p> 	<ul style="list-style-type: none"> • Dispose of the syringe and alcohol swabs as you were instructed. • Remember: use the disposable syringe only once.
